#Matcha Stock and Strength Calculator

[7]:

```
stock = float(input("Current matcha stock (grams): "))
drinks = float(input("Number of drinks to prepare: "))
strength = float(input("Matcha grams per drink: "))
```

Current matcha stock (grams): 1567
Number of drinks to prepare: 38
Matcha grams per drink: 4

[8]:

```
matcha_needed = drinks * strength
remaining_stock = stock - matcha_needed
```

[9]:

```
print("Matcha needed:", matcha_needed, "grams")
print("Remaining matcha stock:", remaining_stock, "grams")
```

Matcha needed: 152.0 grams
Remaining matcha stock: 1415.0 grams
